

Christmas Light Specification

To date, there have not been any comments received from Councillors.

However, there has been a few comments (not representative) on Abergavenny Voice that previous coloured lights scheme was preferred rather than white and blue.

The trees on St John's Square are mature enough to support lights, there are 6 single stemmed trees which would be suitable

Centrepiece such as a tree or large light decoration – location St John's Square or Brewery Yard, area of grass by Morrisons?

Light projections?

Lower Cross Street – carry on with Christmas trees above shops or is there an alternative?

Any additional lights would likely require a reduction in other parts of the town.

Suggest that any proposals are discussed with the soon to be formed Town Partnership.
